-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 29 September 2003.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

Art Unit: 1751

Claims 1-61 are pending in this application.

DETAILED ACTION

Claim Objections

1. Claims 7-61 objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim should refer to other claims in the alternative only, and/or, can not depend from any other multiple dependent claim. See MPEP § 608.01(n). Accordingly, the claims have not been further treated on the merits.

Specification

2 The abstract objected to as being in improper format because the abstract is not limited to a single paragraph on a separate sheet.

Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

Examiner position

3 The examiner makes of record that instant claim 2 recites a broad percentage amounts followed by a series of narrow percentage amounts. For examination purposes, the examiner asserts that the narrow percentage amounts recited in the instant claim 2 are merely exemplary amounts, and thus, the prior art will be applied against the broadest percentage amount recited in the instant claim 2. Further, the examiner suggests that applicant should delete the narrow

percentage amounts from the instant claim 2, and add new dependent claims that recite the narrow percentage amounts recited in the instant claim 2.

Claim Rejections - 35 USC § 102

4 The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-2 and 4 are rejected under 35 U.S.C. 102(b) as being anticipated by Chi et al. (US' 5,527,832).

Chi et al. (US' 832) teaches a composition comprising a block polymer of polyxamer 407 which reads on the block polymer of the claimed formula (2) and wherein the percentage amount of block polymer polyxamer 407 in the composition is 17% which higher than 5% as claimed in claim 1 and lower than 20% as claimed in claim 2 (see col. 3, Example 2). Chi et al. (US' 832) also teaches the polyethylene glycol polymer PEG-90 (polyethylene glycol 4000) as claimed in claim 4 (see col. 3, Example 2). Chi et al. (US' 832) teaches all the limitations of the instant claims. Hence, Chi et al. (US' 832) anticipates the claims.

Allowable Subject Matter

5 Claims 3, 5 and 6 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. The prior art of record does not teach or disclose the limitations of the instant claims.
